

About Us

IEEE IEM Student Branch, founded in year 2017, falls under the Kolkata Section of Region 10 of the organisation. With a vision to foster technological innovation and excellence for the benefit of humanity, IEEE IEM SB indulges in activities and awareness through conduction of Technical Seminars, Workshops, Conferences and other technical & cultural activities leading to promotion of IEEE and advancement of technology in a right perspective.

Our event STACK, to be held on 30th April, 1st and 2nd May 2021, stands for Science Technology And Computing Knowledge. It brings forth an amalgamation of both technical and non-technical events, also known as TRACKS. And in addition to the unique events, it creates a platform for students to interact with eminent speakers from various leading industries. These TRACKS are very endearing and enriching events that will specialise in preparing students to face real world challenges. Featuring Technical/Non-technical Talks, Competitions, Case studies, internships and project opportunities, STACK is reaching out to students all across the nation.

To process transactions. IEEE uses personal information such as name, physical address, telephone number, email address, and company/institution to engage in interactions with you, including contacting you about your order, donation, subscription, event participation, or membership. We use financial/credit card and payment information to process your order and may need to share some of this information with delivery services, credit card clearing houses, and other third parties to complete the transaction.

To provide support or other services. IEEE may use your personal information to provide you with support or other services that you have ordered or requested. IEEE may also use your personal information to respond directly to your requests for information, including registrations for newsletters, webinars, or other specific requests, or pass your contact information to the appropriate IEEE distributor or reseller for further follow-up related to your interests.

To provide information based on your needs and respond to your requests. IEEE may use your personal information to provide you with notices of new product releases and service developments.

To provide online forums and social networks. Some services available on the websites permit you to participate in interactive discussions, post comments, opportunities, or other content to a bulletin board or exchange, or otherwise engage in networking activities. Some of these services are moderated; all may be accessed for technical reasons (for example, for improvements or fixes). IEEE does not control the content that users post to these forums or social networks. You should carefully consider whether you wish to submit personal information to these forums or social networks and tailor any content you submit appropriately and in accordance with the relevant terms of use. You should also review any additional terms and conditions that may govern your use of these services, including terms related to sharing your personal information and receiving communications.

To administer products. IEEE may contact you if you purchase products to confirm certain information about your order (for example, that you did not experience problems in the download process). We may also use this information to confirm compliance with licensing and other terms of use and may share it with your company/institution.

To select content, improve quality, and facilitate use of the websites. IEEE may use your personal information, including the information gathered as a result of site navigation and electronic protocols and cookies (including third-party cookies), to help create and personalize website content, improve website quality, track marketing

campaign responsiveness, evaluate page response rates, conduct usability testing, and facilitate your use of the websites (for example, to facilitate navigation and the login process, avoid duplicate data entry, enhance security, keep track of shopping cart additions, and preserve order information between sessions).

To serve personalized advertising to you. We don't share your information with advertisers without your consent. We allow advertisers to choose the characteristics of users who will see their advertisements, and we may use any of the non-personally-identifiable attributes we have collected to select the appropriate audience for those advertisements. When you click on or otherwise interact with an advertisement, there is a possibility that the advertiser may place a cookie in your browser and that your attributes meet the criteria the advertiser selected.

To assess usage of IEEE products and services. IEEE may track your usage of IEEE products and services (e.g., IEEE Xplore) to determine your level of usage, and those usage statistics may be made available to IEEE's content licensors and your company/institution.

To communicate with you about a meeting, conference, or event. We may communicate with you about a meeting, conference, or event hosted or co-sponsored by IEEE or one of our business associates. This may include information about the event's content, event logistics, payment, updates, and additional information related to the event. Information you provide when registering for or participating in a conference managed or co-sponsored by parties, other than or in addition to IEEE may be shared with those parties, and the treatment of such information is further subject to the privacy policies of those parties. IEEE and its conference co-sponsors may contact you after the event about the event, subsequent iterations of the event and related events. Please note that IEEE conference, meeting or event organizers, co-sponsors, exhibitors, and other third parties may directly request your personal information at their conference booths or presentations. Providing your information to them is optional, and you should review their privacy policies to address your particular needs and concerns about how they will treat your personal information.

To consider you for a higher member grade or an IEEE award. IEEE may use personal information such as your name, education, work history, and volunteer activities to consider you for a higher member grade or for an IEEE award. IEEE may need to share this information with your nominators, references, judges, and others parties involved in evaluating your eligibility.

To include you in IEEE Member Directories. If you are an active member of IEEE, one of its Societies, or IEEE Standards Association, at your request, we may include your information in IEEE Member Directory in IEEE Collabratec, and, if applicable, the Fellows Directory and IEEE Society Directories. We may also enable private member to member messaging (your email address is never shared). Active members can customize their member directories visibility preferences any time in account settings.

To document standards development participation. If you are a participant in IEEE standards development, IEEE uses your personal information to comply with policies and procedures, legal and accreditation requirements, and evaluation of patent claims by patent offices. IEEE must capture your personal data for these purposes, and provides information about activities related to standards development groups in which you participate. IEEE standards development participation is documented through various methods, e.g., rosters, submission documents, email reflectors, records of meeting attendance, responses to ballots, publicly available participation lists, and

declaration of affiliations.

To assist in your participation in IEEE activities. IEEE will communicate with you, if you are participating in certain IEEE activities such as IEEE conferences, authoring or reviewing an IEEE periodical article, or IEEE humanitarian activities. IEEE may send you information such as newsletters related to those activities.

These third parties are restricted from using this data in any way other than to provide services for IEEE or for the collaboration in which they and IEEE are contractually engaged (for example, hosting an IEEE database or engaging in data processing on IEEE's behalf, or mailing you information that you requested). These third parties are carefully selected by IEEE and obligated to keep your data secure. From time to time, we may also share your information with third parties whom we think might provide content, products, or services of interest to you.

To protect IEEE content and services. We may use your information to prevent potentially illegal activities and to enforce our terms and conditions. We also use a variety of technological systems to detect and address anomalous activity and to screen content to prevent abuse, such as spam. These efforts may, on occasion, result in a temporary or permanent suspension or termination of some functions for some users

To get feedback or input from you. In order to deliver products and services of most interest to our customers, from time to time, we may ask members, customers, volunteers, and website visitors to provide us input and feedback (for example through surveys, usability studies, focus groups).

To protect IEEE information assets as well as your own personal data. The IEEE Information Security Program protects the confidentiality, integrity, and availability of IEEE information assets by following a risk management approach based on policies, standards, guidelines, and procedures to meet security objectives while supporting business and operational goals.

How can you control your information?

You can control the information we have about you and how we use it in several ways.

- If you are a registered user, you can review, revise, and correct the personal data that you have provided to IEEE via [IEEE Account/MyProfile](#).
- Use the unsubscribe method provided in our various communications

Personal data about minors and children

IEEE does not knowingly collect data from or about children under 16 without the permission of parent(s)/guardian(s). If we learn that we have collected personal information from a child under 16, we will delete that information as quickly as possible. If you believe that we might have any information from or about a child under age 16, please contact us.

How will you know if the Privacy Policy is changed?

IEEE may update its Privacy Policy from time to time. If we make any material changes we will notify you by email if you have an IEEE Account, or by means of a notice on this

website prior to the change becoming effective. We encourage you to periodically review this page for the latest information on our privacy practices.
